

**Course Title:** Windows Movie Maker

**Duration:** 9 hours

**Course Description:** Windows Movie Maker provides the means to create, edit, and share movies. Windows Media technologies provide the user with the ability to capture, edit, and re-encode media content into the Windows Media video format, a tightly compressed format which requires a minimal amount of storage space on a computer's hard disk.

Upon completion of this course, the student will be able to: Import video/audio, edit movie clips, add special effects, add music and narration and publish movies to the web.
